

I have had the pleasure of dealing with Jamie field and the crew at Precision Metal Roofing for over 12 years and can highly recommend them to as an efficient professional organization who gets the job done right the 1<sup>st</sup> time.

They have the manpower, recourses and skills to tackle any metal roofing/ sheet cladding project through from the smallest extension to major commercial projects.

While you may get a cheaper quote you will not get a better job or more professional organization, they operate best practice in relation to issues such as OH &S, Codes, standards & practices and can organize SWIMs, crane lifts and fall protection as required.

A builders reputation is only as good as the work they can produce and Precision Metal Roofing are always my first call with respect of any roofing work.
